Quick Clip Assembly Instructions

1.

2.

3.

1. Place the two stainless clamps in the alignment grooves of the locator facing the same direction.
2. Slide the locator with clamps over the end of hose.
3. Slide fitting into hose until the collar of the fitting is firmly touching the locator. There is no oil needed for this procedure. Using the Quick Clip crimping plier (part # 530-8766), crimp the two stainless clamps until pliers are completely bottomed out.

Correctly crimped Quick Clip Fitting

Build your own O.E. hoses in half the time! No power required with AP Air's Quick Clip fittings! Our Quick Clip line gives you more versatility in shop, as well as the field. This crimping system requires no hydraulics, no power to operate, is reusable, and has virtually no crimp failure!

Many O.E. Quick Clip fittings are available.
